

We've now been in our home for 6 ½ years and still tell anyone who asks us about our fabulous experience with Bruce Muir and his team at Elmworth Construction.

The project was consistently on time and on budget, except for our upgrades. We could not have asked for better workmanship and we are proud to say that the majority of the people were from the Cowichan valley. The project manager, Al Stone can only be described as a gem. His communication with us was regular and he treated the project like his home.

Over the years, Bruce has continued to provide advice and contacts for our various projects. If we ever considered another home, our first choice would be Elmworth Construction.
